Week 1 Quiz

calificación del último envío 100%

1.	The R language is a dialect of which of the following programming languages?	1 / 1 puntos
	Scheme	
	Fortran	
	Lisp	
	S	
	 ✓ Correcto R is a dialect of the S language which was developed at Bell Labs. 	
2.	The definition of free software consists of four freedoms (freedoms 0 through 3). Which of the following is NOT one of the freedoms that are part of the definition? Select all that apply.	1 / 1 puntos
	The freedom to run the program, for any purpose.	
	The freedom to study how the program works, and adapt it to your needs.	
	The freedom to redistribute copies so you can help your neighbor.	
	The freedom to improve the program, and release your improvements to the public, so that the whole community benefits.	
	The freedom to prevent users from using the software for undesirable purposes.	
	Correcto This is not part of the free software definition. Freedom 0 requires that the users of free software be free to use the software for any purpose.	
	The freedom to sell the software for any price.	
	Carracta	

	✓	This is not part of the free software definition. The free software definition does not mention anything about selling software (although it does not disallow it).	
	The	e freedom to restrict access to the source code for the software.	
	✓	Correcto This is not part of the free software definition. Freedoms 1 and 3 require access to the source code.	
3.	In R the	e following are all atomic data types EXCEPT: (Select all that apply)	1 / 1 puntos
	og log	ical	
	✓ dat	ta frame	
	✓	Correcto 'data frame' is not an atomic data type in R.	
	✓ list		
	✓	Correcto 'list' is not an atomic data type in R.	
	✓ tab	ole	
	✓	Correcto 'table' is not an atomic data type in R.	
	inte	eger	
	✓ ma	ntrix	
	✓	Correcto 'matrix' is not an atomic data type in R.	

	✓ array	
	✓ Correcto 'array' is not an atomic data type in R.	
	character	
	complex	
	numeric	
4.	If I execute the expression $x <- 4L$ in R, what is the class of the object `x' as determined by the `class()' function?	1 / 1 puntos
	Ological	
	integer	
	matrix	
	character	
	numeric	
	complex	
	 Correcto The 'L' suffix creates an integer vector as opposed to a numeric vector. 	
5.	What is the class of the object defined by the expression $x \leftarrow c(4, "a", TRUE)$?	1 / 1 puntos
	numeric	
	character	
	Ological	
	mixed	
	integer	
	Correcto	

6.	If I have two vectors $x \leftarrow c(1,3,5)$ and $y \leftarrow c(3,2,10)$, what is produced by the	1 / 1 puntos
	expression rbind(x, y)?	
	a vector of length 3	
	a vector of length 2	
	a 2 by 2 matrix	
	a matrix with two rows and three columns	
	a 3 by 3 matrix	
	a 3 by 2 matrix	
	Correcto The 'rbind' function treats vectors as if they were rows of a matrix. It then takes those vectors and binds them together row-wise to create a matrix.	
7.	A key property of vectors in R is that	1 / 1 puntos
7.	A key property of vectors in R is that the length of a vector must be less than 32,768	1 / 1 puntos
7.		1 / 1 puntos
7.	the length of a vector must be less than 32,768	1 / 1 puntos
7.	the length of a vector must be less than 32,768 elements of a vector can be of different classes	1 / 1 puntos
7.	the length of a vector must be less than 32,768 elements of a vector can be of different classes elements of a vector can only be character or numeric	1 / 1 puntos
7.	the length of a vector must be less than 32,768 elements of a vector can be of different classes elements of a vector can only be character or numeric elements of a vector all must be of the same class	1 / 1 puntos
7.	the length of a vector must be less than 32,768 elements of a vector can be of different classes elements of a vector can only be character or numeric elements of a vector all must be of the same class a vector cannot have have attributes like dimensions	1 / 1 puntos

The character class is the "lowest common denominator" here and so all

elements will be coerced into that class.

	a character vector of length 1.	
	✓ Correcto	
	a character vector containing the letter "a".	
	✓ Correcto	
	a list containing character vector with the letter "a".	
	a list containing the number 2 and the letter "a".	
9.	Suppose I have a vector $x <- 1:4$ and a vector $y <- 2$. What is produced by the expression $x + y$?	1 / 1 puntos
	a numeric vector with elements 3, 4, 5, 6.	
	a numeric vector with elements 3, 2, 3, 4.	
	a numeric vector with elements 1, 2, 3, 6.	
	an integer vector with elements 3, 2, 3, 4.	
	an integer vector with elements 3, 2, 3, 6.	
	a numeric vector with elements 3, 2, 3, 6.	
	✓ Correcto	
10.	Suppose I have a vector x <- c(3, 5, 1, 10, 12, 6) and I want to set all elements of this vector that are less than 6 to be equal to zero. What R code achieves this? Select all that apply.	1 / 1 puntos
	x[x > 6] < 0	
	x[x == 6] <- 0	
	x[x %in% 1:5] <- 0	

You can create a logical vector with the expression x % in% 1:5 and then use the [operator to subset the original vector x.

- $x[x \le 5] < 0$
 - ✓ Correcto

You can create a logical vector with the expression $x \le 5$ and then use the [operator to subset the original vector x.

- x[x == 0] < 6
- x[x < 6] < 0

✓ Correcto

You can create a logical vector with the expression x < 6 and then use the [operator to subset the original vector x.

- x[x == 0] <- 6
- | x[x > 0] < -6
- x[x != 6] < 0
- x[x >= 6] <- 0
- x[x < 6] == 0
- 11. Use the Week 1 Quiz Data Set to answer questions 11-20.

1 / 1 puntos

In the dataset provided for this Quiz, what are the column names of the dataset?

- Month, Day, Temp, Wind
- 1, 2, 3, 4, 5, 6
- Ozone, Solar.R, Wind
- Ozone, Solar.R, Wind, Temp, Month, Day

Correcto

12.	Extract the first 2 rows of the data frame and print them to the console. What does the	е
	output look like?	

1		Ozone	Solar.R	Wind	Temp	Month	Day
2	1	9	24	10.9	71	9	14
3	2	18	131	8.0	76	9	29

1		Ozone	Solar.R	Wind	Temp	Month	Day
2	1	18	224	13.8	67	9	17
3	2	NA	258	9.7	81	7	22

)	1		0zone	Solar.R	Wind	Temp	Month	Day
	2	1	7	NA	6.9	74	5	11
	3	2	35	274	10.3	82	7	17

✓ Correcto

You can extract the first two rows using the [operator and an integer sequence to index the rows.

13. How many observations (i.e. rows) are in this data frame?

1 / 1 puntos

1 / 1 puntos

-	-	
/	- 7	15
	- 1	47

129

153

160

✓ Correcto

You can use the `nrows()' function to compute the number of rows in a data frame.

1 / 1 puntos

)	1		0zone	Solar.R	Wind	Temp	Month	Day		
	2	152	18	131	8.0	76		29		
	3	153	20	223	11.5	68	9	30		
) [1		Ozone	Solar.R	Wind	Temp	Month	Day		
	2	152 153	31 29		10.9 9.7	78 82				
	1		Ozono	Solar.R	Wind	Tomn	Month	Day		
	2	152 153	34 13	307	12.0 10.3	66 76	5	17		
$) \mid$	1 2	152	Ozone 11	Solar.R	Wind 9.7					
	3	153	108	44 223	8.0	62 85		20 25		
✓	Tł			nction is a	an ea	sy wa	ay to ex	xtrac	t the last few elements of an R	
√/ Mhat i	Th ob	ne `ta oject.	il()' fur					xtrac	et the last few elements of an R	
	Th ob is th	ne `ta oject.	il()' fur	nction is a				xtrac	t the last few elements of an R	1 / 1 pt
21	Th ob is th	ne `ta oject.	il()' fur					xtrac	t the last few elements of an R	1/1 pu
21 34	Tr ob is th	ne `ta oject.	il()' fur					xtrac	t the last few elements of an R	1 / 1 pi
21	The object of th	ne `ta oject.	il()' fur					xtrac	t the last few elements of an R	1 / 1 pi

The single bracket [operator can be used to extract individual rows of a data

16. How many missing values are in the Ozone column of this data frame?

frame.

37

43

O 9	
78	
Correcto The `is.na' function can be used to test for missing values.	
17. What is the mean of the Ozone column in this dataset? Exclude missing values (coded as NA) from this calculation.	1 / 1 puntos
18.0	
31.5	
42.1	
53.2	
Correcto The `mean' function can be used to calculate the mean.	
18. Extract the subset of rows of the data frame where Ozone values are above 31 and Temp values are above 90. What is the mean of Solar.R in this subset?	1 / 1 puntos
334.0	
185.9	
212.8	
205.0	
Correcto You need to construct a logical vector in R to match the question's requirements. Then use that logical vector to subset the data frame.	
19. What is the mean of "Temp" when "Month" is equal to 6?	1 / 1 puntos
85.6	

	\bigcirc	90.2
	\bigcirc	75.3
	•	79.1
	•	✓ Correcto
20.	Wh	at was the maximum ozone value in the month of May (i.e. Month is equal to 5)? 1 / 1 puntos
	0	18
	•	115
	0	97
	0	100
		✓ Correcto
